Dev Tailor

Aspiring Data & AI Engineer | Python • SQL • ML Fundamentals

+91 9109631194 | devtailor81@gmail.com | linkedin.com/in/dev-tailor | github.com/Devtailor14

Education

Bachelor of Technology, Computer Science and Engineering — **Vellore Institute of Technology**

Expected May 2026

- **CGPA:** 7.73 / 10.0
- **Relevant Coursework:** Data Structures, DBMS, Operating Systems, Computer Networks, Probability Fundamentals

Skills

- **Programming:** Python, SQL, JavaScript, C++
- **Data & AI:** Pandas, NumPy, Data Cleaning, Exploratory Data Analysis, Machine Learning Basics, Statistics (Mean, Variance, Correlation)
- **Databases:** MySQL, MongoDB, Relational Database Concepts, Query Optimization
- **Tools:** Git, Docker, REST APIs, Linux
- **CS Fundamentals:** Data Structures, DBMS, OS, Computer Networks
- **Soft Skills:** Analytical Thinking, Problem Solving, Collaboration, Ownership Mindset

Professional Experience

Lit Labs | Software Developer Intern — **Indore, India**

July 2024 - December 2024

- Built scalable applications interacting with backend services handling structured datasets and API responses.
- Optimized database queries and indexing strategies, reducing response time from 2.1s to 750ms for 10,000+ daily searches.
- Worked with real-time streaming data ensuring low-latency updates for 1,000+ concurrent users.
- Debugged production issues using logs, data inspection and performance analysis across distributed modules.

Projects

Traffic-Sense-AI (Computer Vision Analytics System) — **Project Link**

- Developed analytics system to process AI inference outputs and visualize vehicle detection data in real time.
- Implemented structured data transformation pipeline for model outputs.
- Designed monitoring dashboard to analyze traffic density patterns and trends.
- Worked with streaming data and optimized update latency to sub-second performance.

PixelPrompt — Generative AI Image Platform — **Project Link**

- Built AI powered text-to-image platform integrating external ML inference APIs.
- Implemented authentication, request validation and API orchestration workflows.
- Designed data flow for managing prompts, results and usage tracking.
- Reduced redundant processing using caching strategies and optimized API handling.

Relevant Coursework

- Data Structures and Algorithms
- Database Management Systems
- Operating Systems
- Computer Networks
- Probability and Statistics (Fundamentals)

Leadership & Responsibilities

Mozilla Firefox Club — Web Development Team

- Developed official club website and event platform, increasing engagement by 30%.
- Managed 300+ students during technical workshops and sessions.

Achievements

- Top 10 Finalist, HP Power Lab Hackathon (2025) – Built optimization solution using data driven decision logic.

Certifications

- MERN Stack Developer (SmartBridge)
- DevOps Fundamentals (IBM)
- NPTEL Cloud Computing (2024)
